

## Quick Troubleshooting the iPad

There's no sound! The sound's too loud! The sound's too soft!

1. Make sure the headphones volume wheel is turned up.
2. Double click the home button fast (on bottom of iPad) and a banner will appear on the bottom of the iPad with pictures of the apps
3. Without lingering too long on the pictures, swiftly swipe your finger to the right, showing an audio screen.
4. Make sure headphones are plugged in.
5. Change the volume until desirable.
6. Tap anywhere outside of the banner to return back to the main page.

The app is frozen! Somebody save this app! It wants to live!!

1. Double click home button fast (on bottom of iPad) and a banner will appear on the bottom of the iPad with pictures of the apps
2. Press and hold any app until all apps start to jiggle
3. Tap the minus sign inside the red circle. You have now restarted the app.
4. Tap outside of the banner to exit.
